

# Critical Incident Management: Core Elements to Enhance Your Approach

February 25, 2020

## **TODAY'S DISCUSSION**

- 1. Introduction to Speakers**
- 2. A Quick Refresher on Critical Incident Management**
- 3. Core Elements of an Electronic Incident Management System**

# TODAY'S DISCUSSION

- 1. Introduction to Speakers**
- 2. A Quick Refresher on Critical Incident Management*
- 3. Core Elements of an Electronic Incident Management System*

# INTRODUCTION TO SPEAKERS

**Dr. Jay Bulot**

Vice President for State Markets  
WellSky Corporation

**Dustin Schmidt**

Associate Director  
Navigant – A Guidehouse Company

# TODAY'S DISCUSSION

1. *Introduction to Speakers*
2. **A Quick Refresher on Critical Incident Management**
3. *Core Elements of an Electronic Incident Management System*

# THE BASICS

## Critical Incident Definition

- “Critical incidents” are situations that put the health, safety or welfare of participants at risk. Some states also use the term “adverse”, “serious” or “sentinel events”.
- Common critical incident types tracked by State Medicaid Agencies:
  - Abuse, Neglect, and Exploitation
  - Unexpected Deaths
  - Unexpected Hospitalization
  - Serious Injury
  - Criminal Activity/Legal Involvement
  - Loss of Contact/Elopement
  - Suicidal Behavior
  - Medication Errors
  - Use of Restraints/Seclusion

## CMS Requirements

- States operating HCBS waivers are required to provide assurances to CMS that necessary safeguards are in place to protect the health, safety, and welfare of participants receiving services. For critical incidents this includes:
  - The state must demonstrate on an ongoing basis that it **identifies, addresses and seeks to prevent instances of abuse, neglect, exploitation and unexplained death.**
  - The state must demonstrate that an **incident management system is in place** that effectively resolves those incidents and prevents further similar incidents to the extent possible.

# RECENT OIG AND CMS ACTIVITIES

## OIG

- Jan. 2018: OIG/ACL provide a roadmap for states to improve their critical incident management systems.
- Jul. 2019: OIG releases a guide for how states can use diagnosis codes in health insurance claims to help identify unreported abuse or neglect.
- Jan. 2020: OIG releases audit findings of PA's reporting and monitoring of critical incidents of Medicaid beneficiaries with developmental disabilities.

## CMS

- CMS issued a statewide survey in July 2019, responses were due on or before August 28, 2019.
- CMS created H&W Special Review Teams (SRTs) that will work with states during the next three years to improve H&W issues.
- In FFY 2019, CMS conducted visits in three states.

## What's Next?

- We anticipate that CMS will share high-level results of its statewide survey later this year.
- CMS expects to visit another 15 states in FFY 2020.
- CMS anticipates providing additional trainings and educational materials to support critical incident management.
- We may see more OIG audits.

# TODAY'S DISCUSSION

1. *Introduction to Speakers*
2. *A Quick Refresher on Critical Incident Management*
3. **Core Elements of an Incident Management System**

# CORE ELEMENTS OF AN INCIDENT MANAGEMENT SYSTEM

1 |  Policy

2 |  Reporting

3 |  State Review

4 |  Investigations

5 |  Outcomes

6 |  Analytics

7 |  Quality Improvement

# POLICY WILL DRIVE YOUR SYSTEM

- Without policy, there is no system.
- Key policy elements
  - 1. Incident types and definitions**
  - 2. Reporting and follow-up timeframes**
  3. Requirements part of provider licensure/certification (e.g., staff training)
  - 4. Incident notification requirements (intake and investigation results)**
  - 5. State agency and provider responsibilities (e.g., reporting, notifications, investigations, etc.)**
  6. Protocols for state agency review and investigations
  7. Mortality review protocols
  8. Rules governing non-compliance (e.g., when to issue a penalty vs. corrective action plan)
  9. Performance measures
  - 10. Approach to continuous quality improvement**

**Bold** = Discussed in more detail in subsequent slides.

1	Policy	
2	Reporting	
3	State Review	
4	Investigations	
5	Outcomes	
6	Analytics	
7	Quality Improvement	

# SELECTING CRITICAL INCIDENT TYPES IS THE MOST IMPORTANT POLICY DECISION

CMS describes several considerations for states to identify incident types:

Identify reportable incidents which are **clear and understandable so stakeholders can easily identify which incidents are reportable.**

- Consider those which CMS includes in its Technical Guidance to the state.

Identify which reportable incidents are **critical or noncritical.**

- This allows states to better focus their resources for incidents that cause or have the potential for causing the most harm. Critical incidents may require a more in-depth investigation requiring an expedited timeline and additional resources.

Determine if incidents are critical or noncritical by identifying **how the state will respond to incidents.** Determine **what types of incidents require follow-up** as not to overload the system.

- Prioritizing incidents based on response helps set expectations and limits over-commitment by the state.
- For example, if the state defines *all* missed medications as a critical incident and *reviews and investigates all* these incidents, then the state runs the risk of delaying a follow-up for incidents that cause potential harm to individuals, such as medication errors for Schedule II drugs (i.e., serious and potentially dangerous drugs).

Determine if **frequency of occurrence** impacts whether incidents are critical or noncritical.

- States may require a more involved investigation on noncritical incidents occurring to the same individual repeatedly.

# DETERMINE WHO IS INVOLVED

**Key Decision Points:**

1. Who is responsible for completing a critical incident report?
2. Who is responsible for notifying other parties (e.g., the case manager or medical physician)?
3. Who will investigate? This may involve multiple parties
4. Who is responsible for provider corrective action plans/sanctions?

## Kentucky – Role of the Direct Service Provider

Entity	Definition/Responsibilities
Direct Service Provider	<p><b>Definition:</b> A direct service provider is any person, agent, or employee of a provider entity who provides a 1915(c) HCBS waiver service. In the case of subcontractors, the responsibility for reporting incidents rests with the contracted direct service provider.</p> <p><b>Key Responsibilities Include:</b></p> <ul style="list-style-type: none"> <li>• Notify all appropriate parties as described in Section 3 of this guide.</li> <li>• For critical incidents, direct service providers submit the <i>Incident Reporting Form</i> and <i>Critical Incident Investigation Report</i> to the appropriate regulating agency. For non-critical incidents, direct service providers complete the <i>Incident Reporting Form</i> and store at the direct service providers' location.             <ul style="list-style-type: none"> <li>○ The direct service provider is responsible for reporting:                 <ul style="list-style-type: none"> <li>▪ All incidents that occur at the direct service providers' location;</li> <li>▪ All incidents where the direct service provider is the first person to witness or discover the incident, regardless of location.</li> </ul> </li> </ul> </li> <li>• Investigate the critical incident with involvement of the waiver participant's case manager or support broker/service advisor.</li> <li>• Participate in case manager and regulating agency investigations.</li> </ul>

## Massachusetts – Roles and Responsibilities

Role	Role Description
Provider	<p>Responsible for:</p> <ul style="list-style-type: none"> <li>• Submitting the initial and final incident report via HCSIS</li> <li>• Revising and resubmitting the incident report if necessary</li> </ul>
MRC Staff	<p>Responsible for:</p> <ul style="list-style-type: none"> <li>• Conducting the first and second level of review             <ul style="list-style-type: none"> <li>○ <i>First-Level:</i> Case Manager</li> <li>○ <i>Second-Level:</i> Case Manager Supervisor</li> </ul> </li> <li>• Revising incident categories if necessary</li> <li>• Returning the incident report to providers if necessary</li> <li>• Approving/ closing the incident</li> </ul>
DDS Staff	<p>Responsible for:</p> <ul style="list-style-type: none"> <li>• Conducting the first and second level of review             <ul style="list-style-type: none"> <li>○ <i>First-Level:</i> Area Office</li> <li>○ <i>Second-Level:</i> Regional Office</li> </ul> </li> <li>• Revising incident categories if necessary</li> <li>• Returning the incident report to providers if necessary</li> <li>• Approving/ closing the incident</li> </ul>

- 1 | Policy 
- 2 | Reporting 
- 3 | State Review 
- 4 | Investigations 
- 5 | Outcomes 
- 6 | Analytics 
- 7 | Quality Improvement 

# DETERMINE TIMEFRAMES FOR REPORTING, REVIEW, AND RESOLUTION

- Our Recommendations:**
1. Establish clear timeframes for notifying, reporting, reviewing, and investigating critical incidents.
  2. Timeframes should consider the type of critical incident (high risk = more aggressive timeframe for follow-up) and staff bandwidth.

## Kentucky – Critical Incident Notification and Reporting Timeframes

	Notification/Reporting To	Timeframe
Notifications	Law Enforcement (For incidents involving criminal activities)	<ul style="list-style-type: none"> <li>• <b>Critical incident:</b> As soon as possible but no later than <b>eight (8) hours</b> of witnessing or discovering the incident.</li> <li>• <b>Non-critical incident:</b> Within <b>24 hours</b> of witnessing or discovering the incident.</li> </ul>
	DCBS – APS and CPS (For incidents involving ANE)	
	Family Member: For adults, a family member is only notified if the waiver participant has provided consent via their PCSP. For children, a family member is always notified.	
	Medical Provider: The medical provider is notified for incidents involving medication errors or hospitalization.	
	Direct Service Provider	
Reporting	Case Manager or Support Broker/Service Advisor	<ul style="list-style-type: none"> <li>• <b>Incident Reporting Form (for critical incidents):</b> Within <b>same day</b> if the critical incident is witnessed or discovered during regular business hours (8 am-4:30 pm Eastern Time Monday-Friday, excluding state holidays) OR <b>next business day</b> if the critical incident is witnessed or discovered outside of regular business hours.</li> <li>• <b>Incident Reporting Form (for non-critical incidents):</b> Notification to the regulating agency is <b>not required</b>.</li> <li>• <b>Critical Incident Investigation Report:</b> Within <b>10 business days</b> of witnessing or discovering the incident.</li> </ul>
	State or Private Guardian (If applicable and if specified in the PCSP)	
	Regulating Agency (DMS, DAIL, or DBHDID)	

1 | Policy 

2 | Reporting 

3 | State Review 

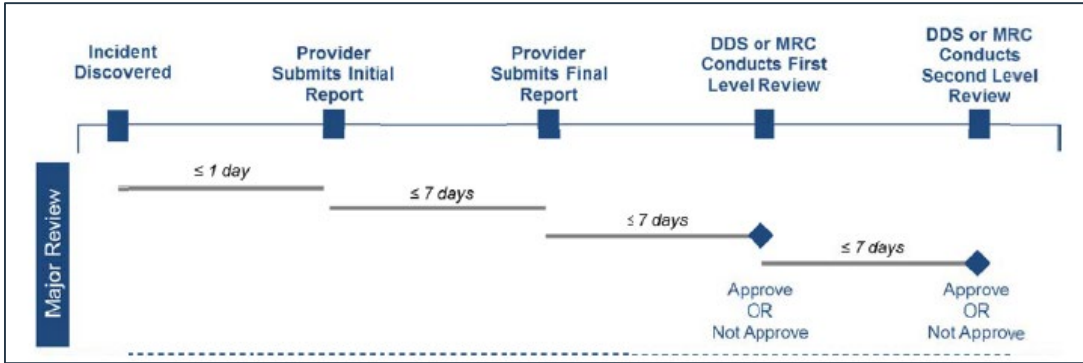

4 | Investigations 

5 | Outcomes 

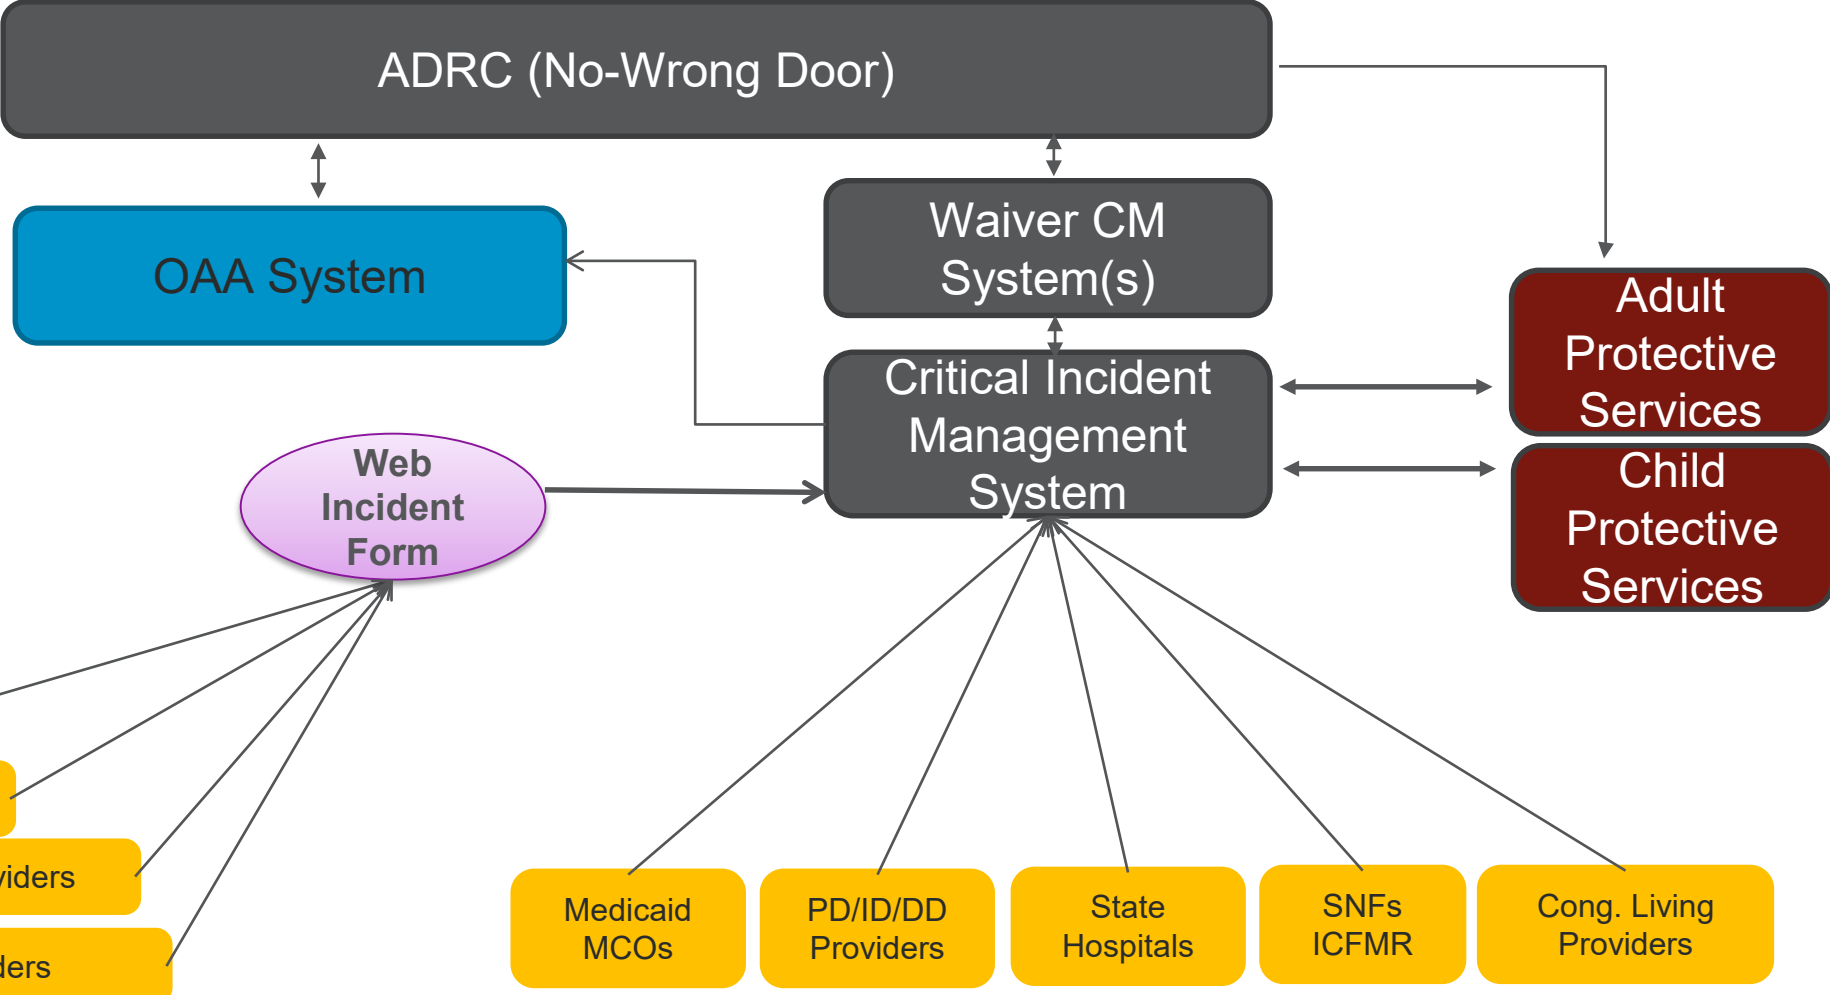

6 | Analytics 

7 | Quality Improvement 

## Massachusetts – Major Level Review Timeframes

# DETERMINE WHO WILL INTERACT WITH THE SYSTEM

- 1 | Policy
- 2 | Reporting
- 3 | State Review
- 4 | Investigations
- 5 | Outcomes
- 6 | Analytics
- 7 | Quality Improvement

# REPORTING CRITICAL INCIDENTS

## Our Recommendations:

1. Offer multiple avenues for reporting (e.g., online, call center)
2. If using an electronic system, use dropdowns whenever feasible.
3. Key components to capture:
  - Individual Impacted
  - Reporting Source
  - Incident Information
  - Notifications
  - Alleged Perpetrator
  - Witnesses
  - Risk Mitigation

## Unique Fields Tracked by State Medicaid Agencies

### Kentucky – Risk Mitigation

1	What is the person's current status? (Choose one) <input type="checkbox"/> Stable with no serious changes noted <input type="checkbox"/> Seen by professional and returned home <input type="checkbox"/> Seen by professional and admitted to facility (specify location and date below) <input type="checkbox"/> Other, briefly describe:
2	Could this incident have been prevented? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown If yes, then how could the incident have been prevented? (Choose one) <input type="checkbox"/> Track/monitor medical treatment (ER, doctor, hospital, etc.) to identify trends <input type="checkbox"/> Ensure timely implementation of current Crisis Support Plan <input type="checkbox"/> Modification of person-centered service plan <input type="checkbox"/> Track/monitor previous incidents to identify trends <input type="checkbox"/> Change in environmental factors <input type="checkbox"/> Other, briefly describe:

### Colorado – Subcategories for Incident Types

SERIOUS INJURY TO OR ILLNESS OF CLIENT	
Serious Injury/Illness Type: [check one] <input type="checkbox"/> Laceration requiring sutures/staples <input type="checkbox"/> Fracture <input type="checkbox"/> Dislocation <input type="checkbox"/> Loss of Limb <input type="checkbox"/> Other _____	
<input type="checkbox"/> Serious Burn <input type="checkbox"/> Skin Wound due to poor care <input type="checkbox"/> Suicide Attempt <input type="checkbox"/> Brain Injury	
Cause of Injury/Illness: [check one] <input type="checkbox"/> Fall <input type="checkbox"/> Medical Condition <input type="checkbox"/> Poor Care <input type="checkbox"/> Seizure	
<input type="checkbox"/> Accident <input type="checkbox"/> Treatment Error <input type="checkbox"/> Undetermined <input type="checkbox"/> Other _____	
Did Serious Injury/Illness Result in Hospitalization? <input type="checkbox"/> Yes <input type="checkbox"/> No If Yes is selected, where was client Hospitalized? _____	

### Massachusetts – Body Part of Injury

(23) Body Part Affected by Injury: CHECK ALL THAT APPLY			
<input type="checkbox"/> Toe	<input type="checkbox"/> Genitals	<input type="checkbox"/> Face	<input type="checkbox"/> Arm
<input type="checkbox"/> Foot	<input type="checkbox"/> Front Torso	<input type="checkbox"/> Eye	<input type="checkbox"/> Elbow
<input type="checkbox"/> Ankle	<input type="checkbox"/> Back Torso	<input type="checkbox"/> Nose	<input type="checkbox"/> Wrist
<input type="checkbox"/> Knee	<input type="checkbox"/> Internal Organs	<input type="checkbox"/> Ear	<input type="checkbox"/> Hand
<input type="checkbox"/> Leg	<input type="checkbox"/> Neck	<input type="checkbox"/> Mouth	<input type="checkbox"/> Finger
<input type="checkbox"/> Hip	<input type="checkbox"/> Head	<input type="checkbox"/> Shoulder	<input type="checkbox"/> Other

# STATE REVIEW

CMS describes several elements of **reviewing incoming incidents**. The State should:

- ✓ Ensure that reviewers have a firm understanding of what and how to review incident reports (e.g., conduct trainings or encourage use of a standardized checklist).
- ✓ Determine and validate the severity of a reported incident.
- ✓ Determine if there needs to be follow-up or communication with other affiliated individuals/agencies.
- ✓ Identify a timeline for reviewing and triaging incident reports.
- ✓ Use the triage process to determine if an investigation is necessary as a response to the incident.
- ✓ Plan on the types of follow-up that must occur during the course of the investigation with the individual, family member/guardian, and service provider based on incident severity.

Additionally, OIG recommends that States establish an incident management review committee to review certain serious incidents, review investigation adequacy, collaborate with other agencies, and identify and respond to trends in reported incidents.

# STATE REVIEW (CONTINUED)

## Our Recommendations:

1. The state should have protocols in place that describe its criteria for reviewing critical incidents.
2. Responsibilities across providers and state agencies is key.
3. Key components to capture:
  - Name of the Reviewer
  - Date Review Completed
  - Resolution Type (e.g., no action taken, requires investigation, CAP issued, technical assistance offered, moratorium/termination, etc.).

## Massachusetts – State Agency Review Process Management

Individual Information	Name: WALKERTESTSUBGRPA, JASON	SSN: XXX-XX-6	DOB: 1/3/1970	Gender:	State Agency: MRC	Area Office:
Incident Information	Incident ID: 239038	Incident Date: 2/1/2012	Primary Incident Nature: Unexpected/Suspicious Death			
<b>Action Step:</b>		<b>Targeted Completion Date:</b>	<b>Responsible Party (Name and/or Position):</b>			
dsa						
<input type="button" value="Add"/>		<input type="button" value="Edit"/>	<input type="button" value="Delete"/>			
<b>Action Steps Follow-up: Corrective Action in Response to the Incident</b>						
Describe each corrective action step that has been or will be taken in response to the incident and/or the investigation including modifications to the individual's plan:						
Are there action steps for this incident? *						
Yes						
Action Step (list each action individually):		dsa				
Targeted Completion Date (MM/DD/YYYY):						
Responsible Party (Name and/or Position):						
Was the action completed as recommended? *		-				
Other comments, if applicable:						
Completion Date (MM/DD/YYYY):						
Finalized By:		-				
Finalized Date:		-				
<input type="button" value="Reset"/>		<input type="button" value="Save"/>		<input type="button" value="Finalize"/>		

# INVESTIGATIONS

## OIG/ACL Recommendations:

1. The State should ensure independent State investigations of allegations of specified incidents (e.g., abuse and neglect that results in serious or repeated harm to participants; sexual abuse; unexpected deaths; incidents that result in life-threatening or serious injury or illness that appear to be due to provider misconduct/ANE or due to environmental hazards; etc.).
2. The State may delegate investigation for other incident situations to provider agencies or other entities.
3. Investigations of physical abuse / neglect that result in death or serious injury should be reviewed within 14 days. All other incidents should be reviewed within 30 days.

## Our Recommendations:

1. Develop a standard template for conducting investigations. Key components to capture:
  - Parties Involved
  - Evidence Collected
  - Findings
  - Outcome of the Investigation
1. Establish policies and procedures for investigators.
2. Consider whether joint state agency investigations are needed.
3. Determine how to share results with other relevant state agencies.

1	Policy	
2	Reporting	
3	State Review	
4	Investigations	
5	Outcomes	
6	Analytics	
7	Quality Improvement	

# INVESTIGATIONS – PRIOR INVOLVEMENT REVIEW

## Benefits of a Comprehensive Incident Management System:

1. Person level data allows State identify prior involvement across programs including:
  - Waivers
  - Protective Services
  - Facilities
2. Develop effective correction action plans addressing recidivism by:
  - Victims
  - Perpetrators
  - Providers

	Waiver	Total Closures	Total Non-Compliant	% of Total Compliant	Days Past Compliance			
					1 to 30	31 to 60	61 to 90	91 Plus
<b>Region 1</b>		<b>24</b>	<b>0</b>	<b>100.00%</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>
	ADHC	5	0	100.00%	0	0	0	0

# OUTCOMES

## Our Recommendations:

1. Determine how critical incidents are closed and what fields are used to track outcomes/resolutions.
2. Determine whether additional follow-up is needed and how follow-up actions are tracked.
3. Determine whether recoupment or a financial penalty is needed.

## Iowa – Incident-Specific Resolution Reviews:

<b>Staff Review</b>	<p><b>(Please note: Complete the Staff Review section only if staff issues contributed to the incident.)</b></p> <p>Review staff: (select all that apply)</p> <p><input type="checkbox"/> increase number of staff      <input type="checkbox"/> disciplinary action  <input type="checkbox"/> increase staff hour      <input type="checkbox"/> change staff  <input type="checkbox"/> improve team building      <input type="checkbox"/> terminate staff  <input type="checkbox"/> increase supervision of staff      <input type="checkbox"/> other, describe: _____</p> <p>Provide staff training on: (select all that apply)</p> <p><input type="checkbox"/> rights  <input type="checkbox"/> individual needs  <input type="checkbox"/> behavioral needs  <input type="checkbox"/> positive and supportive relationships  <input type="checkbox"/> communication with member, family and/or other staff  <input type="checkbox"/> staff trained / retrained on equipment use  <input type="checkbox"/> other, describe: _____</p> <p><input type="checkbox"/> Resolution following staffing review / training. # ANALYTICS

## Our Recommendations:

1. Have a regular cadence for collecting and/or analyzing data.
2. Define thresholds or tolerance for critical incidents requiring statewide, regional, or provider level corrective action.
3. Determine if critical incident data correlate with effective risk mitigation or the need for improvement at the individual, regional or system level.

## Iowa – Listing of Incident Reports

The screenshot shows a web application interface for incident reports. At the top, there are navigation tabs: HOME, QM, PAM, ESP, ADMIN, TOOLS. Below these are links for Reports, Alerts, Misc, IM Utilities, DPPC, Data Extracts, DR Utilities, IN Utilities, MT Utilities, and SC Supervisory Tool. A breadcrumb trail reads: Tools > Reports > Reports Request > Reports Request. The main content area is titled 'Reports List' and contains two expandable sections: 'Health Care Record' (expanded) and 'Incident Management' (collapsed). Under 'Incident Management', there is a table with two columns: 'Reports' and 'Description'. The table lists several report types, with 'Aging Incident Summary Report' highlighted by a blue box.

Reports	Description
<a href="#">Aging Incident Detail</a>	Provides detailed information about incident reports that have been filed during a specified period of time but have not been completed or reviewed within the allotted time frames.
<a href="#">Aging Incident Summary Report</a>	Provides list of incident reports sorted by provider for which the Initial Report and/or the Final Report have not been completed within the allotted timeframe.
<a href="#">Deleted Events Report</a>	Provides detailed information regarding each deleted event, including when it was deleted and who made the deletion.
<a href="#">Event Counts</a>	Provides summary data on the number of events per month broken down by primary and secondary category within a specified date range. Includes site level incidents.
<a href="#">Event Counts Detail By Provider</a>	Summarizes event counts as the Event Counts Report currently does, but it is sorted by provider. Includes site level incidents.
<a href="#">Events By Individual Detail Report</a>	Provides a complete list of events grouped by individual during a specified period of time.
<a href="#">Events By Site/Provider</a>	Provides a complete list of events grouped by provider and site during a specified period of time.
<a href="#">Incidents By Case Status</a>	This report provides a status summary for incident reports entered in HCSIS. Displays summary totals and percentages by month and yearly quarter for open and closed incidents at each review level.

# QUALITY IMPROVEMENT

## Our Recommendations:

1. Institute multidisciplinary critical incident review teams to review incidents, trends, investigations, and corrective actions.
2. Formalize process for recommending system level changes if the data indicates a need.
3. Develop critical incident report card or dashboard.
4. Determine the need for change in policy or process.

Critical Incident Report Card	# Incidents	# preventable	Trends
Total Number of Incidents	36	13	↑
Number of Falls with Injury	6	2	↓
Number of ED Admits	12	3	↔
Unexpected Deaths	4	1	↔
Medication Errors	10	4	↓
Use of Restraints/Seclusion	4	4	↑

*Report Cards and Dashboards make it easy for leadership to see which critical incidents may require attention or mitigation.*

# About WellSky

WellSky is a technology company advancing human wellness worldwide. Our software and professional services address the continuum of health and social care — helping businesses, organizations, and communities solve tough challenges, improve collaboration for growth, and achieve better outcomes through predictive insights that only WellSky solutions can provide.

## We are committed to

- Serving our customers to ensure they can serve their communities
- Anticipating provider needs in an ever-changing care landscape
- Using data and applied insights to elevate and intelligently scale care

Together, we are realizing care's potential and building communities that thrive.

# We partner with organizations across the care spectrum

**Hospital:**  
Ensuring hospitals can focus on delivering superior patient care safely and efficiently

**Practices & Facilities:**  
Enhancing providers' abilities to streamline operations and focus on the delivery of care

**Home:**  
Empowering providers to deliver exceptional care while focusing on improving outcomes

**Community:**  
Supporting dynamic communities of care with our diverse set of human services solutions
